Accessibility Conformance Report WCAG Edition

(Based on VPAT[®] Version 2.5)

Name of Product/Version: Law Trove - 2024 (<https://www.oxfordlawtrove.com>)

Report Date: August 2024

Product Description: Law Trove contains around 200 textbooks covering the core and optional subject areas taught on an undergraduate law degree. Also included are seven Essential Cases supplements, which are unique to Law Trove and introduce students to the key case law within a subject area and link straight to the relevant legal judgments. Law Trove also provides direct access to a wide range of enhanced materials and content types including videos, interactive learning materials, and self-testing resources. The content is easily searchable, with hyperlinked cross-references to aid navigation; students can also personalize their experience by creating their own profile and saving content, searches, and annotations.

Notes:

Web conformance for this report is generated by evaluating the Law Trove website and the following group of pages in it.

- Homepage
- Personal Profile

- Subject
- Advanced Search
- About Page

Evaluation Methods Used:

Law Trove has been evaluated for the Academic division of Oxford University Press for accessibility of its text and features. The evaluation was conducted in accordance with WCAG 2.2 Success Criteria for Level A and Level AA conformance, and the accessibility standards established in Section 508 of the United States Rehabilitation Act.

A team of experienced accessibility checkers has assessed the application and its related material according to following steps:

- Overall technical analysis of the application against the Success Criteria for users with visual impairments, hearing impairments, motor disabilities and Cognitive impairments.
- Manual evaluation of the Law Trove website pages using assistive software (NVDA), and assessment tools (CCA, Text spacing), and keyboard-only approaches to identify issues that would affect deaf and hearing-impaired users, blind and visually impaired users, and users with mobility impairments.
 - For assistive software assessment, actions are performed using a screen reader, keeping the application as an active page, and navigating using the keyboard.
 - For keyboard-only assessment, actions are performed by keyboard keystrokes without the use of

a mouse.

- Analysis of color contrast between text and the background color using “Colour Contrast Analyser (CCA)” Tool.
- Evaluation of text content scaling, in which a screen magnifier and browser plugins are used to assess the legibility of content when the text is enlarged/zoomed while using browser and application features.

Assessment has been conducted on the following platforms:

Device	OS Version	Browser	Screen Reader	Tools
PC Desktop	Windows 11	Chrome	NVDA	CCA, Text Spacing
MacBook	macOS Sonoma 14.4.1	Safari	Voiceover	CCA
