Titles in the Complete series combine extracts from a wide range of primary materials with clear explanatory text to provide readers with a complete introductory resource. This chapter ties together the loose strands of judicial review to provide a checklist of issues that must be considered in order to diagnose a judicial review problem and to provide a legal opinion for clients. The following questions are addressed: What are judicial review problem questions designed to test? How does one approach a judicial review problem question? How does one approach whether the body may be judicially reviewed? How does one approach whether the client has standing or may intervene in an action? How does one approach whether the other preconditions are met? How does one approach the grounds for review? How does one deal with issues of remedy? How does one provide a final assessment to the client?
