Since 1973, the English legal system has been radically affected by what is now called ‘EU law’. EU law takes precedence over all national laws, including legislation. This chapter explains the basic structure and relevance of EU institutions, legislation, and case law, and how these affect the methods of legal analysis we employ. The discussions cover the sources of EU law; the institutions of the EU and their increasingly important role in our law-making; the main analytical techniques employed by European lawyers; and the legal method employed in the Court of Justice of the European Union and the effect of EU law on the drafting and interpretation of UK Legislation.
