Constitutional Law, Administrative Law, and Human Rights: A Critical Introduction (8th edn)  
Ian Loveland

Abstract

Constitutional Law, Administrative Law, and Human Rights provides an in-depth cross disciplinary introduction to the subject of public law, covering the core elements of a constitutional and administrative law syllabus. In addition, it explores the latest ongoing debates around potential constitutional reforms. The book draws heavily on historical sources and on ideas from political science and political theory as well as legal and social history. It also includes detailed coverage of the UK’s proposed departure from the European Union after the 2016 referendum and the subsequent Miller litigation as well as the ongoing negotiations on terms of departure. It looks at the polarised positions of ‘soft brexit’ and ‘hard brexit’ and examines what brexit might actually mean for the United Kingdom.

Keywords: constitutional law, administrative law, political science, political theory, Constitutional Reform Act, coalition government, Alternative vote, House of Lords, brexit
