Course-focused and comprehensive, the *Textbook on* series provides an accessible overview of the key areas on the law curriculum. This chapter begins with a brief history of immigration law in the UK, focusing on key legislative developments and noting the themes which arise in that history. Twenty-first-century legislation is discussed in more detail, observing the trends of increasing restriction on those seeking asylum and reduction of appeal rights for all migrants. The tension between the executive and judiciary is noted as a background to much of the development. The chapter concludes with the sources of immigration law, including the immigration rules and policies, and explains that immigration law is not, as was once thought, founded in the prerogative.
