The Concentrate Questions and Answers series offers the best preparation for tackling exam questions. Each book includes typical questions, bullet-pointed answer plans and suggested answers, author commentary and diagrams and flow charts. This chapter describes how examination questions frequently cover several issues. It is impossible to cover each area in the same depth as single-issue questions so it is important to take time listing matters that raise points of law, then specifying the appropriate statute or case law, and finally applying the law to the given facts. A well-crafted question will not contain redundant information, so be prepared to comment on all parts of it. These questions do not ask for an evaluation or criticism of the law as it is, but for identification of legal issues in the narrative given and application of the law to each. It may be appropriate to refer to academic commentary, particularly in new areas of law.
11. Mixed topic questions
