This chapter begins with a discussion of the European market for health. It then analyses examples of those elements of EU health policy that contain a significant 'rights' dimension; outlines the legal framework for the rights dimension of health care policy in the EU; considers the emergence of elements of a European health policy; examines cross-border access to health care in the EU; and considers ethics in science and new technologies in the EU. The prospect of Brexit will not immediately remove nor necessarily diminish the influence of EU law on the field.
3. Health Rights and Obligations in the European Union
