The Concentrate Questions and Answers series offers the best preparation for tackling exam questions. Each book includes typical questions, diagram answer plans, suggested answers, author commentary and advice on study skills. This chapter presents sample exam questions on theft, fraud, and other property offences such as robbery and burglary, along with suggested answers. The law of property is vast, and contained in a number of different pieces of legislation. As this chapter explains, the Fraud Act 2006 was designed to replace many of the discrepancies and inconsistencies in the diverse provisions of the Theft Acts of 1968 and 1978. It pays to be methodical in approaching property problems. Dishonesty is an important concept throughout the property offences. The recent decision in *Ivey v Genting Casinos*, which has an important effect on the definition of dishonesty in criminal law, is dealt with in detail in this chapter.
