Abstract

Business Law provides practical, up-to-date coverage of company, partnership, taxation, and insolvency law, plus all relevant aspects of EU law. The title provides all of the relevant material needed to understand the latest legal developments affecting business law transactions. Coverage of the Companies Act 2006 is fully integrated and given prominence, mirroring the emphasis that business law courses place on this central piece of legislation. Additional emphasis has been placed on taxation and business accounts. Examples are used throughout the volume, which helps readers to contextualise their learning effectively. Updated statutory references allow for the cross-referencing to appropriate primary sources, and the interpretation of such sources. The volume looks at partnerships, companies, taxation, insolvency, and other topics such as choice of business medium, limited liability partnerships, sale of a business, and shareholder agreements.
